WORK EXPERIENCE

Wheelscout project

Darmstadt University of Applied Science

Mar 2020 - August 2020 Germany

During my third semester, I had the opportunity to work under the supervision of Professor Bettina at Darmstadt University of Applied Sciences in Germany. This experience involved collaborating with a virtual team on a global project, providing me with valuable insights into international teamwork. The project focused on developing a mobile navigation app designed to provide barrier-free routes for wheelchair users. My role involved working with the team to collect data and visualize it in graphical charts. We utilized Python to gather essential data from routing requests and responses and employed Chart.js to create the visualizations.

Women leader in Technology (WLIT), Nepal

Mar 2022-Nov 2022 Pokhara

I participated in a 10-day bootcamp organized by Women Leaders in Technology (WLIT), a non-profit organization that helps women in tech become leaders and innovators.

- 10 days of bootcamps on both technical and non-technical skills.
- Smart goal setting, Leadership Training, Presentation Skill and Teamwork etc.
- Communication, time management, design thinking.

The bootcamp ended with a Hackathon where we worked on solutions for improving tourism in Pokhara city, Nepal. The program spans a total of 9 months, offering extensive experience, networking opportunities, and industry-related activities.

Web development Internship

Nipuna Prabhidhik Sewa l Pokhara, Nepal

Sep 2022-Nov 2022 Pokhara

As a web development intern at Nipuna Prabhidhik Sewa, I concentrated on the Laravel framework and gained

significant experience in web application development using PHP, HTML, CSS, and JavaScript. I played a crucial role in designing and managing RESTful APIs, ensuring efficient data retrieval and manipulation with a MySQL database.

Backend Intern

Saptam Tech | Pokhara

June 2023- Aug 2023 Pokhara

As a NestJS intern at Encoders Inc., I had the opportunity to collaborate with a skilled team of developers, gaining valuable experience in backend development. My responsibilities included developing and maintaining RESTful APIs, implementing authentication and authorization to ensure data integrity and security, and playing a key role in optimizing database queries and managing database schemas.

Web Developer

Crumet IT Solution | Pokhara

Dec 2023-Aug 2024 Pokhara

I coordinated with the design team to build responsive web pages using HTML, CSS, JavaScript, and ReactJS. Additionally, I integrated backend functionality using JavaScript frameworks and managed data efficiently with MySQL. I also collaborated with senior team members to review code, ensuring quality and adherence to best practices.

Hour of code

Women leader in Technology (WLIT), Nepal

Supported by Women Leaders in Technology (WLIT), I had the opportunity to provide a one-day session to public school students focused on raising awareness about careers in technology. The session aimed to gauge students' interest in the technical field, particularly among girls, who often hesitate to pursue such careers due to a lack of proper information and guidance.

Through this experience, I improved my interpersonal skills, including:

- **Clear Communication:** Explaining technical ideas in a way that everyone could understand.
- **Presentation Skills:** Gaining confidence in speaking to a group and presenting information effectively.
- **Engagement Techniques:** Using simple, interactive ways to keep students interested and encourage them to consider careers in technology.

Volunteer

Empowering young women in data program

The event, jointly organized by Women Leaders in Technology (WLIT) and the Ankamala team, was an intensive three-day session designed to provide participants with foundational skills in key areas such as Python programming, SQL, data science, data analysis, data visualization, and familiarity with the research field. As a fellow of Women Leaders in Technology, actively engaged in this learning experience, gaining hands-on knowledge in these areas while also contributing to the collaborative learning environment. The event was an excellent opportunity to enhance both technical and analytical skills, which are crucial for advancing in the field of technology and research.

Volunteer

College orientation program

During college orientation sessions, I assisted new students by guiding them through the process and providing essential information about campus resources and facilities. My role was to help them feel at ease and create a welcoming atmosphere as they began their college journey. Through this experience, I grew in my ability to ●

Improved communication skills

- Developed leadership abilities
- Enhanced supportive role

Cloud Computing Course Completion

Completed a comprehensive Cloud Computing course covering fundamental concepts, architectures, and services of cloud computing. Gained hands-on experience with leading cloud platforms, such as AWS, and developed skills in deploying and managing cloud infrastructure. Covered Cloud service models (IaaS, PaaS, SaaS), Virtualization and containerization, Cloud security and compliance, Scalable storage solutions, Cloud-based application development topic.

EDUCATION

Diamond Secondary School - High School

2018 - 2023 Pokhara, Nepal GPA: 3.23

School of Engineering, Pokhara University,

Sep 2018-Oct 2023 Pokhara, Nepal Bachelor of Computer Engineering

Studied in Pokhara university with full scholarship for 4 years of ungraduated degree.

Dean listed (Rank 1) GPA :3.87

PROJECTS

MEETGUIDE- Group Member Mar 2022-Nov 2022 • Participated in hackathons organized by Women

Leaders in Technology, focusing on web development.

- Utilized HTML, CSS, and JavaScript with Node.js, Express.js, and MongoDB database.
- Addressed problems related to tourism, specifically in Pokhara.

WHEELSCOUT PROJECT- Group Member Mar 2020 - July 2020

Worked as team member in WheelScout project, and responsible for statistical collection of routing request/response and visualize in chart.js using python (pip), js, MYSQL database.

- Collected data on routing requests and responses.
- Created visualizations with Chart.js using Python and JavaScript.
- Managed and stored data with MySQL.

connect_krishi- Group Member May 2023- Sept 2023

A mobile app using Flutter to connect farmers, suppliers, and buyers in an agriculture marketplace. A mobile app using Flutter to connect farmers, suppliers, and buyers in an agriculture marketplace. The app integrates secure payment options, personalized recommendations, and direct communication features. It utilizes Firebase for backend services, MySQL for database management, and Google Maps API for location-based services, creating a seamless experience for users.

- Connects farmers, suppliers, and buyers.
- Facilitates product showcasing, price negotiation, and secure transactions.
- Provides personalized recommendations and secure payment options.
- Bridges the gap between farmers and customers.
- Conducted rural surveys to identify and solve selling challenges for farmers.
- Promotes transparency and streamlines the agricultural supply chain.

SKILLS

Programming language: c, c++, Javascript, php, Python

Database: MySQL, MongoDB, PostgreSQL

Version control: Git, Github

Frameworks: Node.js, Express.js, Laravel, NestJS, flask

Project Management: Jira, Asana

Research Interest

- Machine Learning and Artificial Intelligence
- Data mining and visualization
- Database management system

Certifications

- Certification (Transcript) of completion of project by Darmstadt University of applied science, Germany.
- Certificate of Completion of course of Git from online Coursera.org.
- Certificate of completion of course of data processing with python from online Coursera.org.
- Certificate of experience working as web development trainee in nipuna prabhidhik sewa.
- Certification of completing the cloud foundation course
